

INTEGRATED MANAGEMENT SOLUTIONS

Toxicology Laboratory and Specialty Court Management

Integrated Management Solutions (iMs) has provided unique data management solutions through its information system products - WinTOX 6 and COTTS 6 (Court-Ordered Treatment Tracking System) for over 10 years. iMs developed these products utilizing input from professionals in the laboratory and specialty court environments, with an emphasis on streamlining the exchange, rapid retrieval and timely delivery of decision-making information.

WinTOX 6 - Laboratory Data Management

WinTOX 6 provides a secure web based connection, rapid order entry, approval of results and multiple reporting tools to meet the daily demands of a busy laboratory environment. WinTOX 6's advanced features allow your clients to input their orders or review tests results online.

COTTS 6 - Court Ordered Treatment Tracking System

COTTS 6 is a comprehensive caseload management system for specialty court programs. COTTS 6's advanced features allow court personnel to access client and program data via the web securely. COTTS provides case managers the ability to view client history, case information and drug testing results from one source.

Together, they provide full integration with outside laboratories, off-site facilities, treatment centers, and the criminal justice system.
